

Truck Simulator

Driver Training Simulator

Faros advantage

Faros Truck simulator combines leading edge hardware and software technologies in order to impart real-life driver training and experience. At its heart is the time tested software developed by ECA Faros of France, the world leader in aviation, marine and auto training simulators; customised for India to impart driver training as per Indian traffic regulations, environment and traffic conditions. The very robust, extremely responsive and cost effective hardware is developed at IIT Delhi in one of its Technology Business Units.

Customers

Largest installed base of driver training simulators in India and Dubai.
